

## LIVEFIRE TRAINER™

### REALISTIC SIMULATION TRAINING FOR LIVE FIRE RANGES

#### Enhance Your Live Fire Range

The PRISim Suite® LiveFire Trainer™ is the most technologically advanced live-fire weapons simulator available on the market today. It provides a unique training environment for military and law enforcement professionals to practice live firing at interactive HD video-based situations and CGI environments for unprecedented, realistic training.

PRISim Suite® LiveFire Trainer™ is available for installation into any certified live fire shooting range, or one of our self-contained QuickRange® modular ranges.

#### Key Features

- Live fire sensors track rounds up to 3,248 fps and 5.56mm to .50 caliber munitions
- Weapons do not need any modification or attachments to work on live fire system
- Self-healing Linatex screen or a live fire paper screen capable of handling thousands of rounds
- Simulates qualification courses in any live fire range
- Presents consistent training and learning objectives
- Records training performance for after action reviews
- Integrated presentation viewer for briefing and debriefing
- Review and export of training performance
